EDUCATION

SRM Institute of Science and Technology

B.Tech in Computer Science and Engineering — CGPA: 8.77 / 10

Ghaziabad, Uttar Pradesh

Jul 2023 – Present

PROFESSIONAL SUMMARY

Innovative Computer Science undergraduate with a strong foundation in full-stack development, AI-integrated systems, and data analytics. Adept at architecting scalable applications from concept to deployment, with a demonstrated ability to blend intelligent design with engineering precision. Driven by a passion for building purposeful software that creates measurable real-world impact.

WORK EXPERIENCE

Sports Analytics Intern [Certificate]

Jan 2025 – Mar 2025

Infosys Springboard

Remote

- Analyzed large-scale sports datasets to uncover performance trends and deliver actionable intelligence through statistical modeling and predictive analytics.
- Engineered interactive data visualizations that translated complex analytical findings into compelling narratives for stakeholder-driven strategic decisions.
- Streamlined evaluation pipelines by applying robust programming techniques, significantly enhancing workflow efficiency across the analytics lifecycle.

Software Engineering Job Simulation [Certificate]

June 2026

JPMorgan Chase & Co. – Forage

Remote

- Built the Midas transaction-processing service in Java/Spring Boot, integrating Kafka, a SQL database, and a REST API into a unified backend pipeline.

PROJECTS

Vitalink – Cross-Platform Healthcare Application | *Flutter, Dart, Firebase, Firestore, VS Code*

- Architected a full-stack, cross-platform healthcare platform using Flutter and Firebase, implementing secure role-based authentication and a scalable NoSQL data model in Cloud Firestore to manage distinct patient and physician profiles.
- Engineered a dynamic, multi-themed (dark/light) UI with bespoke custom widgets, including a sophisticated 3D rotating logo rendered via `AnimationController` and `CustomPainter`, delivering an immersive, polished user experience.

Acadix AI – Intelligent University Campus Assistant | *Python, React, PostgreSQL, LLM, RAG, Vite*

- Developed a full-stack conversational assistant integrating LLM-based generation, semantic vector search, and intent classification to deliver context-aware, grounded responses for students and faculty.
- Designed a modular Python REST API with dedicated endpoints for authentication, real-time chat, document ingestion, and speech processing – persisted via PostgreSQL with SQLAlchemy ORM.
- Implemented a Retrieval-Augmented Generation (RAG) pipeline with document ingestion and vector-based semantic retrieval, anchoring AI responses in verified, institution-specific knowledge.
- Built a responsive React + Vite frontend styled with Tailwind CSS, featuring real-time chat, push notifications, and role-differentiated dashboards for students and faculty.

AtomVerse – Interactive 3D Periodic Table Explorer | *Three.js, GSAP, JavaScript, GitHub Pages*

[\[Live Demo\]](#)

- Engineered a research-grade educational web application featuring real-time 3D atom visualization for all 118 elements using Three.js and GSAP, with physically-accurate electron shell configurations and relativistic velocity effects for $Z \leq 70$.
- Implemented a **Research Mode** surfacing recent atomic discoveries (2024–26) including the 20-electron ferrocene breakthrough, first valence electron visualization, and chiral phonon-electron spin transfer – making the tool relevant for active chemistry research.
- Deployed on GitHub Pages with zero backend – fully open-source, used as a teaching and research aid for chemistry students.

TECHNICAL SKILLS

Languages: Python, Dart, Java, JavaScript, SQL, HTML/CSS

Frontend: Flutter, React.js, Vite, Tailwind CSS, CustomPainter

Backend: Firebase, Express.js, REST APIs, SQLAlchemy ORM

Databases: Cloud Firestore, PostgreSQL, MySQL

AI / ML: LLM Integration, RAG Pipelines, Vector Search, Pandas, NumPy

Developer Tools: Git, VS Code, Figma, Firebase Console, FlutterFire CLI

Core Competencies: Data Structures & Algorithms, OOP, API Design, Database Modeling, Agile Development

CERTIFICATIONS & ACHIEVEMENTS

2nd Place – IFQM Case Study Writing Competition: Conceptualized “VIVEK Architecture” – a large-scale AI brain framework for collective AI integration within the legal court system, targeting case intelligence management and judicial backlog reduction. [\[Link\]](#)

Certification in Data Structures & Algorithms: Mastered arrays, linked lists, trees, graphs, recursion, and advanced sorting techniques through a comprehensive industry-aligned curriculum. [\[Link\]](#)

Big Data Analytics Certification – Harnessing Volume & Velocity: Developed expertise in transforming high-throughput data streams into actionable intelligence through efficient big data management strategies. [\[Link\]](#)
